Mr. Schreiber, please search the following sequences in commercial and interference databases:

- 1) *Identity*
~~Oligo~~ search of SEQ ID NO:16 against nucleic acid databases. Please size limit search to 20 nucleotides.
- 2) *Identity*
~~Oligo~~ search of SEQ ID NO:17 against nucleic acid databases. Please size limit search to 20 nucleotides.

Please save results to diskette.

Thank you very much.

David J. Steadman

Art Unit 1652
Crystal Mall 1, Room 10D-04
(703) 308-3934

Pending Nucleic Acid and Pending Amino Acid database searches generate two sets of results each. The Pending databases have been split into two parts to reduce the amount of time required for their daily updates. This results in more machine time being available for processing searches. Searches run against the Nucleic Acid Pending database produce two sets of results, with the extensions **.rnpm** and **.rnpn**. Searches run against the Amino Acid Pending database produce two sets of results, with the extensions **.rapm** and **.rapn**.

Because they contain data that is confidential, the results of Pending database searches should not be left in the case .
